Ryko Unveils its Newest Products and Services at NACS

Ryko's newest suite of products and services reinforces they are the One Solution Provider for all car wash needs.

Grimes, Iowa – (October 18, 2017) – Just in time for the 2017 NACS show in Chicago, Ill., Ryko has unveiled a number of new and freshly improved products and services. From new connectivity solutions that make it easier for car wash operators to manage their businesses to profit-boosting improvements to its most popular car wash systems, Ryko is stirring up a lot of excitement this fall.

To help car wash owners to manage their businesses smartly and more profitably, Ryko is introducing NCSTrax. NCSTrax is a comprehensive, cloud-based car wash portal that gives car wash operators real-time access to their most critical service metrics and business insights from any device, anywhere, anytime. The portal is customizable for operators so they can format their dashboard, run their own suites of reports and set up alerts. They can even place chemical orders online and run data analytics to identify trends and further insights.

Ryko has enhanced its Radius HP with a revolutionary new high-pressure pump stand that separates the pump and motor from the rest of the unit. This reduces noise and vibration by more than 50 percent for a quieter and smoother operation that's music to an operator's ears. The Radius touch-free system has also been equipped with new, high-intensity LED lights on its popular ColorWave. With three times the number of lights that are 50 percent brighter, customers will experience a more colorful foaming curtain light show. The ColorWave lighting packages comes in two colors for 2018: ARCTIC Blue and LAVA Orange. The ColorWave also comes with a new and improved manifold for better dispersion and a fuller foaming curtain.

With new standard features added, such as an all-new chemical injection panel and virtual treadle, the legendary SoftGloss MAXX has more to offer than ever before. The chemical injection panel's footprint is 60 percent smaller, taking up less room in a car wash operator's bay or equipment room. The updated chemical injection panel is also easier to maintain and requires less plumbing. Plus, it allows for easier initial chemical setup and calibration.

Another Ryko innovation is the debut of the all-new PaySmart XT Series payment teller kiosk. Its bold, modern, fresh design mirrors the sleek curves and neon lighting of the SoftGloss MAXX 3 car wash. The PaySmart XT incorporates the latest technology, hardware and software for a unique customer experience. The unique dual screens allow car wash operators to run advertising loops on the top screen while a customer waits for their car wash, increasing inside store sales. The intuitive, extra-large, seventeen-inch, 16:9 touchscreen makes it easy for consumers to select a car wash package. This unit is also available with RykoNET and NCSTrax

monitoring built in. It also has the ability to push advertising loops electronically to the payment teller.

Also debuting at NACS is the all new redesigned Rainmaker reverse osmosis (RO) system. The Rainmaker substantially reduces total dissolved solids (TDS) and provides for a cleaner, spot-free car wash experience. Available in one- to four-filter models, this revolutionary, space-saving new system uses powerful pumps to deliver higher pressure and a flow up to 9,000 gallons per day (GPD). The Rainmaker also features a newly designed TDS meter that makes monitoring water quality easier than ever.

Car wash operators can learn more about all these new and enhanced services and products at the NACS Show from October 18 through 21, or they can reach a Ryko representative by calling 1.800.284.7956.
